Additional remarks:

2.1.3 Market Research and Consumer Behaviour in Retailing

Module abbreviation:	RCM_MRCBR	SPO-No.:	2.1
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Subject	1
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	only winter term
Responsible for module:	Knoppe, Marc		
Lecturers:	Gupta, Shipra; Shamma, Hamed M.		
Credit points / SWS:	5 ECTS / 4 SWS		
Workload:	Contact hours:	47 h	
	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Market Research and Consumer Behaviour in Retailing		
Lecture types:	SC / E: seminar course with exercises		
Examinations:	LN - project thesis		
Usability for other study programs:	None		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
<p>Market Research</p> <p>It will be illustrated the interaction between retail and consumer research and retail and consumer management decisions. A focus will be on digital research like google analytics. Students will learn a practical framework for conducting market research to highlight qualitative and quantitative retail and consumer research strategies. Students will know to use a SPSS program. Students will apply the topic by handling different cases.</p> <p>Consumer Behaviour</p> <p>Students will understand consumer behavior. Students will learn that consumer behaviour is central to the planning, development, and implementation of successful marketing strategies. Students are able to evaluate the consumer behaviour of all target groups along all touchpoints shown by a customer journey. Students will apply the topic by handling different cases.</p> <p>Students will learn how new technology is influencing retail and consumer behaviour.</p> <p>The course provides students with the framework for conducting marketing research. During this module, students will be introduced to the marketing research tools which aid marketing managers in marketing decisions. Students will also be introduced to the marketing research process and explain how it is used to collect and analyze information to solve practical marketing problems using examples from real world contexts. The course offers hands-on experience in marketing research-based data analysis.</p>			

<p>The course provides students with an overview of consumer behavior. This will involve analyzing the consumer buying decision process and the factors affecting this process. Issues such as the shifting in values of the German, European and multinational societies, how to appeal to different markets and how we can change attitudes will be tackled. We will often take the perspective of a marketing manager who needs knowledge of consumer behavior in order to develop, evaluate, and implement effective marketing strategies.</p>
<p>Content:</p>
<p>Market Research</p> <ul style="list-style-type: none"> • Introduction • Defining the Marketing Research • Research Design • On- and Offline Research • Interpretation of results • Consumer Decision-Making, Marketing Ethics • Consumer Research <p>Consumer Behaviour</p> <ul style="list-style-type: none"> • Consumers, Marketers, and Technology • Technology-Driven Consumer Behavior • Segmentation, Targeting, and Positioning • Consumer Motivation and Personality • Consumer Perception • From Print and Broadcast Advertising to Social and Mobile Media • Reference Groups and Word-of-Mouth • Consumers in their Social and Cultural Settings • New technology is influencing retail and consumer behaviour

	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Strategic Retail Management, Merger and Acquisitions in Retailing		
Lecture types:	SC / E: seminar course with exercises		
Examinations:	LN - presentation, 15 minutes		
Usability for other study programs:	None		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
At the end of this module the students should be able to apply strategic analysis, understand strategic management tools & methods and conduct strategic value evaluations.			
Content:			
<p>The module strategic retail management and M&A covers the strategic process end to end, starting with customer and market analytics and ending with the execution of the strategy.</p> <p>Customer orientation and centricity are important pillars in the retail industry and a significant part of retail strategic management. Therefore market intelligence and analytics (chapter 1) are the starting point for strategic positioning and shaping. The module will describe the methods and processes in order to understand customer needs, market participants/competitors and future developments/trends.</p> <p>The strategic target positioning (chapter 2) is the base for strategic formulation (how to reach the target position). The process begins with the understanding of the future operating model. After a detailed specification of the target position (vision, mission statement, strategic goals), the strategy formulation outlines the way how to get to the target position coming from the status-quo.</p> <p>The chapter 3 "strategic management" describes the implementation of the strategic measures to execute the strategy. Methods of strategic project management and portfolio management are important parts of the execution process: target setting, resource allocation and monitoring.</p>			

The last topic M&A describes one important measure to execute strategies with either growth or skill improvement priorities. Starting with screening of targets and evaluation of economic value, the chapter also shows the M&A process (strategic management) along case examples.

- CHAFFEY, Dave, Paul R. SMITH and P. R. SMITH, 2017. *Digital marketing excellence: planning, optimizing and integrating online marketing*. F. edition. London ; New York: Routledge. ISBN 978-1-138-19168-6, 978-1-138-19170-9

Additional remarks:

Interactive teaching style with case studies and practical insights.

Students are required to work on a paper which are graded and presented in class.

2.1.10 Sales and Customer Lifecycle Management

Module abbreviation:	RCM_SCLM	SPO-No.:	4.2
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Subject	2
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	Summer semester
Responsible for module:	Vogler, Thomas		
Lecturers:	Vogler, Thomas		
Credit points / SWS:	5 ECTS / 4 SWS		
Workload:	Contact hours:	47 h	
	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Sales and Customer Lifecycle Management		
Lecture types:	SC / E: seminar course with exercises		
Examinations:	schrP90 - written exam, 90 minutes		
Usability for other study programs:	None		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
The students are able to understand the details of the selling process. Regarding the customers they know how to assess customer value and how to create a long term customer relationship. They also have deep knowledge about the relevance of Service Management. They also know how they can use big data to forecast consumer behaviour.			
Content:			
<ul style="list-style-type: none"> • Sales Management • Sales Organization • Sales Force Management • Personal Selling • Customer Relationship Management • Consumer Behaviour and Big Data 			
Literature:			
<i>Compulsory:</i> <ul style="list-style-type: none"> • WAYSHAK, Marc, 2018. <i>The High-Velocity Sales Organization</i>. ISBN 0985411333 • SOLOMON, Michael R., Søren ASKEGAARD und Margaret HOGG, 2019. 7. Edition. ISBN 978-1292245423

Additional remarks:

There will be a final exam of 90 minutes. You are allowed to use a non-programmable pocket calculator during the exam.

2.1.12 Retail and Consumer Project

Module abbreviation:	RCM_RCP	SPO-No.:	5
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Subject	2
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	Winter and summer semester (not in WS23/24)
Responsible for module:	Knoppe, Marc		
Lecturers:	Knoppe, Marc		
Credit points / SWS:	5 ECTS / 4 SWS		
Workload:	Contact hours:	47 h	
	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Retail and Consumer Project		
Lecture types:	S / PT: seminar / project thesis		
Examinations:	LN - Project thesis		
Usability for other study programs:	None		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
<p>The objective of the Retail and Consumer Project is to carry out a personal retail project in a professional way. This gives students the opportunity to put into practice the methodological and technical competences acquired during their studies and to show their ability to work independently. The Retail and Consumer Project offers students professional work experience and the possibility to familiarize themselves with retail business processes.</p>			
Content:			
<p>The Retail and Consumer Project is based on the Retail Lab: Consumer Projects and Project Management. A project might be for instance a retail start-up, a multinational retail project, a retail business case or a special retail project in cooperation with a well-known retailer.</p> <p>Students will have 1-2 supervisors for their Retail and Consumer Project:</p> <ol style="list-style-type: none"> 1. An academic supervisor: a THI professor who will follow the project. 2. Maybe also a company supervisor: a representative of a company who will follow the student's work <p>Typical project phases:</p> <ul style="list-style-type: none"> • problem definition • analysis and market research 			

<ul style="list-style-type: none">• design phase• project documentation• project implementation• presentation of the project results
Literature:
Will be announced at the beginning.

None

2.1.13 Master Thesis

Module abbreviation:	RCM_MT	SPO-No.:	6
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Subject	3
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	Winter and summer semester

Responsible for module:	Knoppe, Marc		
Lecturers:	Knoppe, Marc; Hackl, Oliver; Vogler, Thomas; Stummeyer, Christian; Fend Lars; Jungbluth, Michael		
Credit points / SWS:	25 ECTS / 0 SWS		
Workload:	Contact hours:	23 h	
	Self-study:	602 h	
	Total:	625 h	
Subjects of the module:	Master Thesis		
Lecture types:	Tutorial		
Examinations:	Colloquium		
Usability for other study programs:	None		

Prerequisites according examination regulation:

Release of the Master Thesis subject assumes the successful completion of credits and examinations totaling at least 30 ECTS. There is a six-month preparation period for the Master Thesis. The regulations on the issuance of the thesis in the general examination regulation of the Technische Hochschule Ingolstadt are also applicable.

Recommended prerequisites:

None

Objectives:

Students will show their scientific competence and knowledge.

Content:

The master's thesis seminar will support students in planning and preparing their master thesis. Furthermore, they get an early feedback on their master thesis idea. The seminar is designed for comprehensive preparation (e.g. short presentation of master's thesis proposals, discussion of results and methodological problems). General basics like APA style, literature research and management will be prepared and discussed. The seminar offers a great opportunity for reflection of student's research projects and questions:

- Support in choosing a topic for a master's thesis
- Understanding and practical implementation of the guidelines for the preparation of a master thesis proposal
- Developing an understanding of the structure and style requirements of a master's thesis

The Master's Thesis will be coached and evaluated by a professor and the students choose their topics individually.

Literature:Compulsory:

- Depends on the topic of the Master's Thesis

Recommended:

- GLASMAN-DEAL, 2010. *Science Research Writing for Non-Native Speakers of English*. ICP, ISBN 1-84816-310_X
- GHOURI, P, and K. GRONHAUG, 2010. *Research methods in Business Studies*. 4. Edition. ISBN 0273712047

Additional remarks:

- Deadline winter semester: January 15th
- Deadline summer semester: July 15th

2.2 Compulsory Elective Modules

One compulsory elective module must be chosen.

Not all elective modules are offered in every winter semester.

2.2.1 Consumer Experience Management			
Module abbreviation:	RCM_CEM 1.3. Ind. Elective	SPO-No.:	1.3
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Elective Subject	1
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	only winter term
Responsible for module:	Fend, Lars		
Lecturers:	Fend, Lars		
Credit points / SWS:	5 ECTS / 4 SWS		
Workload:	Contact hours:	47 h	
	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Consumer Experience Management		
Lecture types:	SC / E: lecture with integrated exercises		
Examinations:	PA - project report. Practical work. Written composition approx. 10-15 pages with presentation 15-30 minutes		
Usability for other study programs:	The module is offered as an elective subject in the master's degree program 'Entrepreneurship and Digital Business' as well.		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
<ul style="list-style-type: none"> • Students will have an overview of the current state of knowledge in the field of Consumer Experience Management. • Students will understand the philosophy, language and key frameworks of Consumer Experience Management in a national and international context. • Participants will develop an in-depth knowledge of consumer behaviour: They will develop a differentiated understanding of the motivations and needs of today's customers. • Participants will be able to develop a consumer experience strategy: They will know how to create a comprehensive consumer experience strategy that considers the entire customer journey. • Students can apply the essential concepts and tools to successfully implement a consumer experience strategy 			

<ul style="list-style-type: none"> Finally, students will be able to select the appropriate CXM tools and apply them to specific business tasks.
<p>Content:</p> <ul style="list-style-type: none"> The term and concept of consumer experience management Consumer relationship versus consumer experience management Consumer experience management (CXM) and business transformation Digital consumer experience Consumer experience frameworks Consumer personas The importance of empathy Creating and measuring the consumer journey Consumer journey management and improvement

2.2.2 Digital Analytics and Artificial Intelligence in Retailing

Module abbreviation:	RCM_DA&AIR_1.3 Ind. Elective	SPO-No.:	1.3
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (WS 17/18)	Compulsory Elective Subject	1
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	only winter term
Responsible for module:	Jungbluth, Michael		
Lecturers:	Jungbluth, Michael		
Credit points / SWS:	5 ECTS / 4 SWS		
Workload:	Contact hours:	47 h	
	Self-study:	78 h	
	Total:	125 h	
Subjects of the module:	Digital Analytics and Artificial Intelligence in Retailing		
Lecture types:	SU/Ü - lecture with integrated exercises		
Examinations:	PA - Project report. Practical work. Written composition approx. 10-15 pages with presentation 15-30 minutes.		
Usability for other study programs:	The module is offered as an elective subject in the master's degree program 'Entrepreneurship and Digital Business' as well.		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
<ul style="list-style-type: none"> As defined by the Digital Analytics Association, the analysis of digital data refers to information collected in interactive channels (online, mobile, social, etc.). Digital Analytics has become an integral part of core business strategies and maintaining a competitive edge. Students will learn essential contributions of applied data science, modern technology and artificial intelligence in retail and consumer commerce. Students will receive a profound overview on essential data science methodologies (descriptive, predictive, prescriptive), each within a dedicated retail business context. The course enables students to later act as cross-functional analytics "translators", not as functional experts. Analytics "translators" draw on their domain-, analytics- and technology know-how to help business leaders identify and prioritize their business problems while working closely with multiple functional experts and stakeholders. Students will understand, how predominantly digital challenges can be addressed and automated through analytics and AI to augment retail value chains for sustainable competitive advantages. 			
Content:			
<ul style="list-style-type: none"> Approximately 1/3 of each lesson will be devoted to the underlying analytics theory, to selected use cases within the field of retailing and to hands-on problem solving with open source software. 			

- We cover methods of data exploration, inference and hypothesis testing, clustering and segmentation, visualization and storytelling, regression, decision trees, experiments, testing and causation, recommendation engines, big data, machine learning and AI.
- Google Analytics will be introduced as the current market dominating digital analytics tool. Utilizing Google Analytics, students will learn how to use Digital Analytic software technology in the context of analytical, exploratory and reporting capabilities. Students will learn by doing: that is, guided by the instructor and using software, they will focus on data discovery and communicating insights.
- Open source code will be provided as Google Collaboratory notebooks for best traceability and learning support for IT-savvy as well as non-IT-savvy students.

2.3 Voluntary Elective Subjects

The following modules can be taken voluntarily. There is no crediting of ECTS.

2.3.1 Science Skills in Retailing			
Module abbreviation:	RCM_SSR	SPO-No.:	N/A
Curriculum:	Programme	Module type	Semester
	Retail and Consumer Management (SPO WS 17/18)	Voluntary elective subject	2
Module attributes:	Language of instruction	Duration of module	Frequency of offer
	English	1 semester	only summer term
Responsible for module:	Jungbluth, Michael		
Lecturers:	Jungbluth, Michael		
Credit points / SWS:	0 ECTS / 2 SWS		
Workload:	Contact hours:	24 h	
	Self-study:	24 h	
	Total:	48 h	
Subjects of the module:	Science Skills in Retailing (RCM_SSR)		
Lecture types:	SU/Ü - lecture with integrated exercises		
Examinations:	Without performance record		
Usability for other study programs:	The module is offered as an optional elective subject in the Bachelor's Program 'International Retail Management' (IHM) as well.		
Prerequisites according examination regulation:			
None			
Recommended prerequisites:			
None			
Objectives:			
<ul style="list-style-type: none"> • Students will understand, under which circumstances retail settings require a dedicated research design to answer managerial questions properly. • Students will receive a hands-on introduction to the required toolset enabling the preparation, execution and analysis of a research design (Google Colab runtime environment, R, python). • Students will build their own retail research design from scratch in class, while reflecting step by step on the important aspects of this research design. • Finally, we discuss the basics of building a proper survey to collect the necessary data for identification and interpretation. 			
Content:			
<ul style="list-style-type: none"> • Hands-on introduction to Google Colab, R and Python in comparison to Excel. • Empirical research and measurement: Why research needs a design? 			

- Research questions in retail: Why hypothesis testing?
- Describing relationships (causality vs. correlation)
- Identification and causal diagrams
- Observed vs. unobserved information
- Controlling for „back doors“ and the benefit of RCTs
- Measuring constructs and scales to build a survey

Literature:*Compulsory:*

- Huntington-Klein, N. (2022). The Effect: An Introduction to Research Design and Causality. CRC Press. Boca Raton.

Recommended:

- Chapman, C. and McDonnell Feit, E. (2019). R for Marketing Research and Analytics. 2nd Edition. Springer. Cham.
- Schwarz, J. and Chapman, C. and McDonnell Feit (2020). Python for Marketing Research and Analytics. 3rd Edition. Springer. Cham.

Additional remarks:

None
