

**Innovative. Cosmopolitan. Responsible.**

*The Institute for New Energy Systems (InES) is one of three institutes for applied research at Technische Hochschule Ingolstadt (THI). It comprises the research activities in the fields of Building Energy Systems, Industrial Energy Systems, Energy Systems Engineering and Technology Transfer & International Projects. Outstanding Bachelor and Master students will find excellent development opportunities at InES.*

We are looking for  
**Bachelor / Master Students**

to support us in our international projects with African partners

**Technology Transfer & International Projects:**

The lack of access to energy is one of the main obstacles to reducing poverty and bolstering industrialisation, as can be witnessed around the globe. That is why the focus on international research activities at InES is one of the cornerstones of the institute's strategy. InES has specialised on cooperations with scientific institutions and companies in Africa. The InES group *Technology Transfer & International Projects* is responsible for the overall coordination of these joint research projects and is looking for interested students to join the team.

**Tasks:**

1. Support the coordination and organisation of meetings with African partners (digital and on-site)
2. Assist the international students from our African partner universities during their stays in Ingolstadt
3. Help organise excursions and workshops for guest from Africa
4. Write newsletter articles and updates for social media
5. Support the team in the overall coordination of the joint research projects
6. Work with the team in developing new project proposals

**What we are looking for:**

- High motivation to work with international partners
- Proficiency in English and German
- Good knowledge of Microsoft Office applications
- Independent and reliable work ethics
- Pre-existing experience with the African continent is an asset – but we explicitly also welcome students without any prior knowledge

**What we offer:**

- The opportunity to work hands-on in an international environment
- Gain enriching insights into different cultures
- Learn how to manage international research projects
- Depending on the available funding, the possibility to join meetings in Africa

**Starting period:** As soon as possible

**Application documents:** CV, Letter of Motivation, any relevant certificates (e.g., prior work experience)

**Contact:** [abschlussarbeiten\\_ines@thi.de](mailto:abschlussarbeiten_ines@thi.de)
