

Installation VPN Client – Windows 10

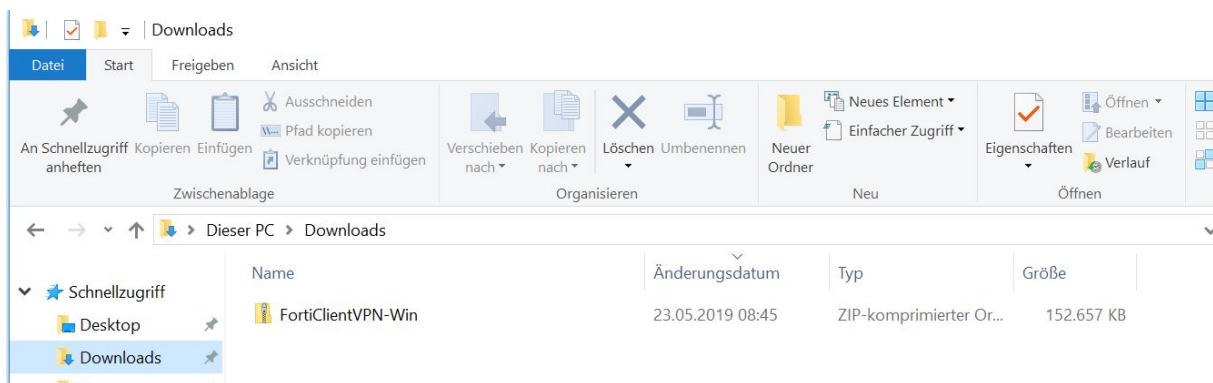

Go to <https://vpn.thi.de> and log in there with your THI account:
Name: abc1234 (your THI user account, not your THI mail address)
Password: ***** (your associated password)

A login form titled 'Please Login with your THI User Account'. It contains two input fields: 'Name' and 'Password'. Below the fields is a green 'Login' button and a white button with a shield icon labeled 'Launch FortiClient'.

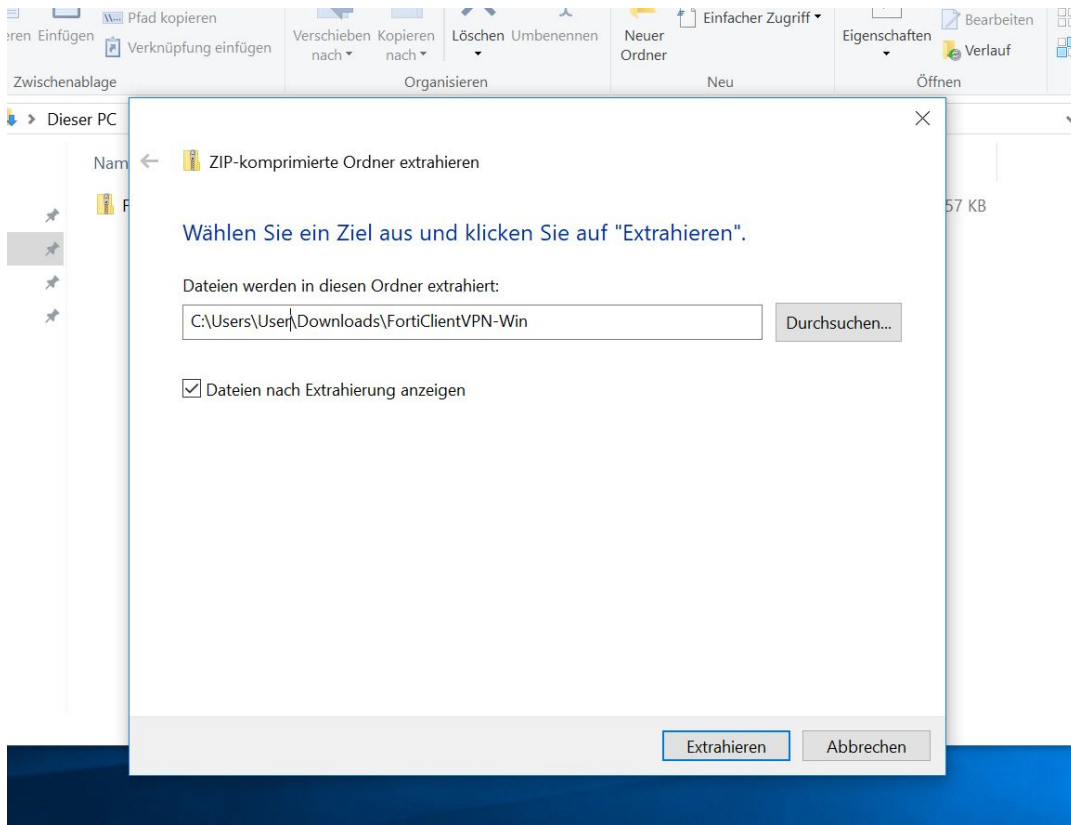

Choose under Download FortiClient your operating system and download the installation file.

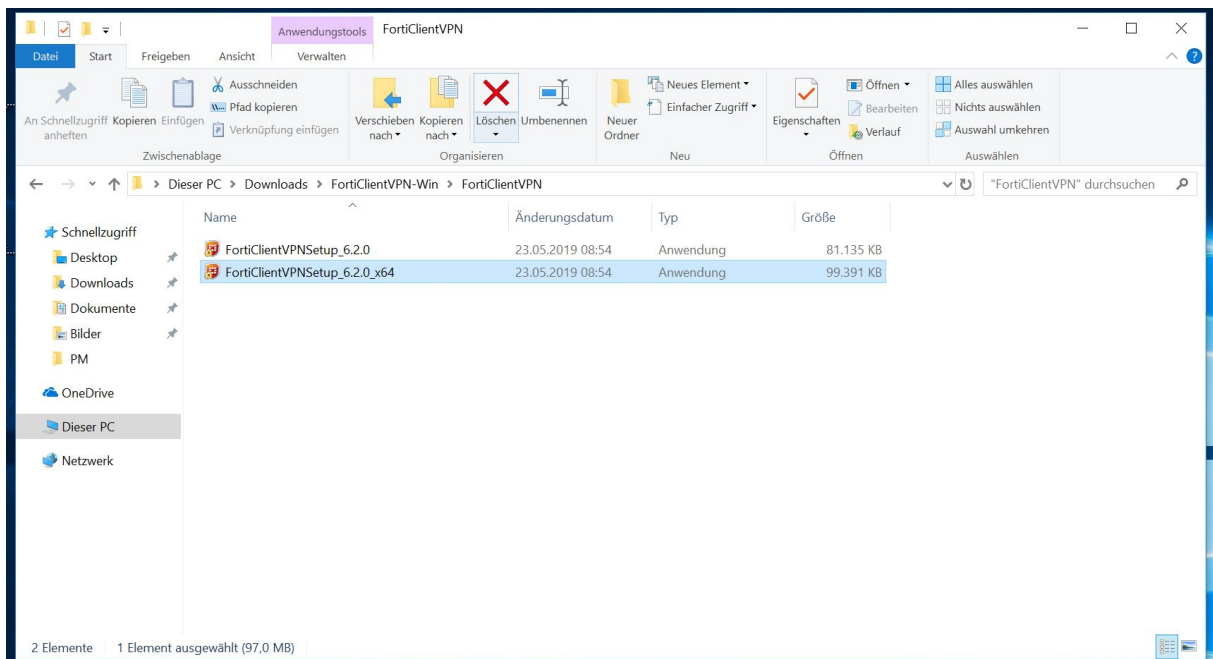

After that you will find the file in the download folder of your computer.

Right-click the zip folder to select extract, then output the destination folder and click extract.

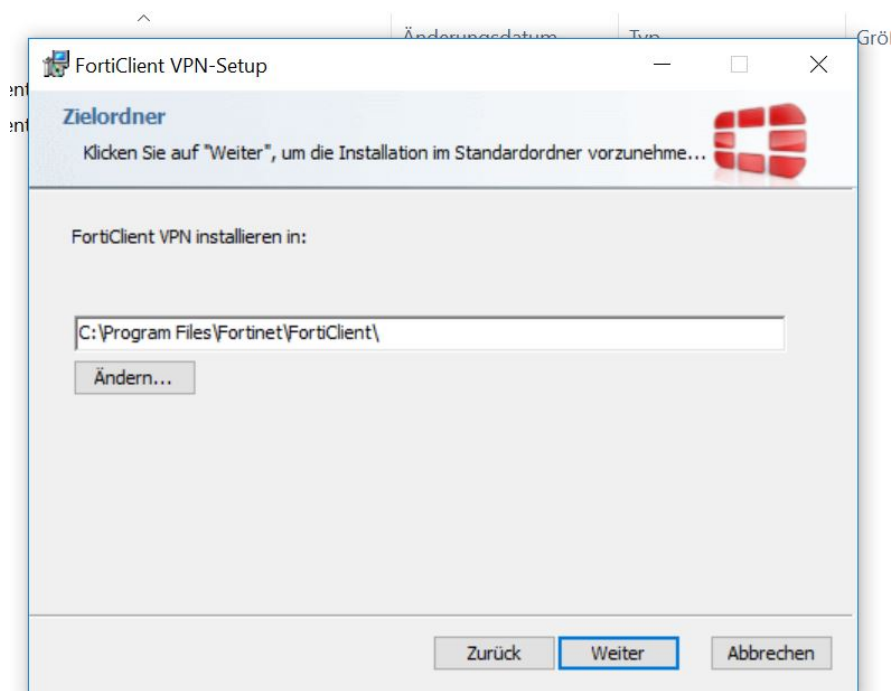

After that you will find two installation files in the extracted folder, once for the 32-bit version of your operating system and once for the 64-bit version. Click on the required file to start the installation.

Then you will be guided through the installation with a setup wizard. First, you must agree to the license agreement and confirm it.

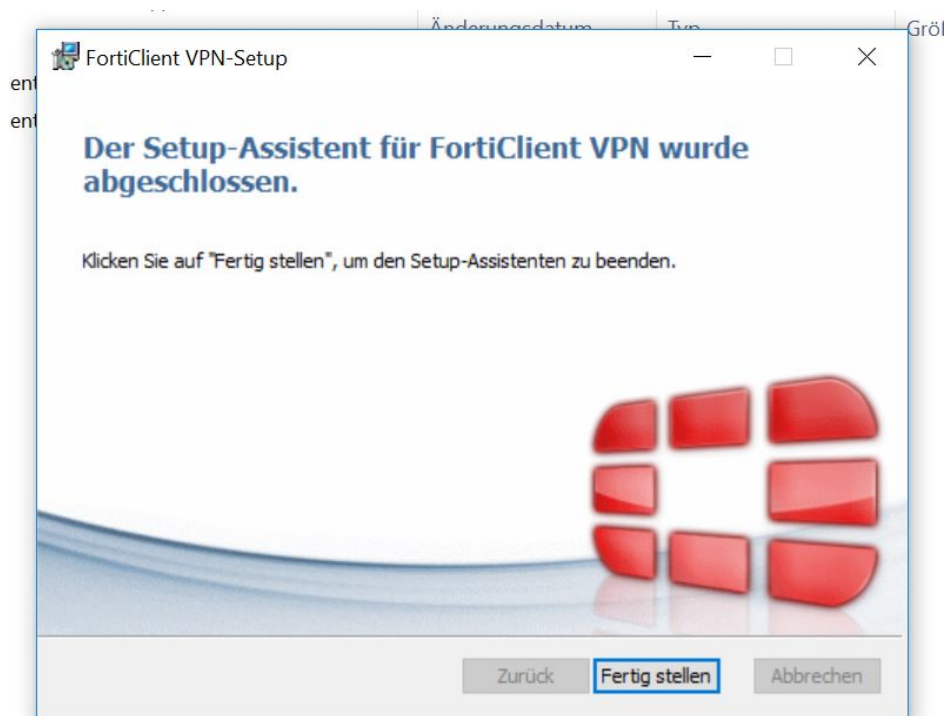

Then you can select the installation folder or leave it at the default folder and click "Next".

Click on "Install" to start the installation .

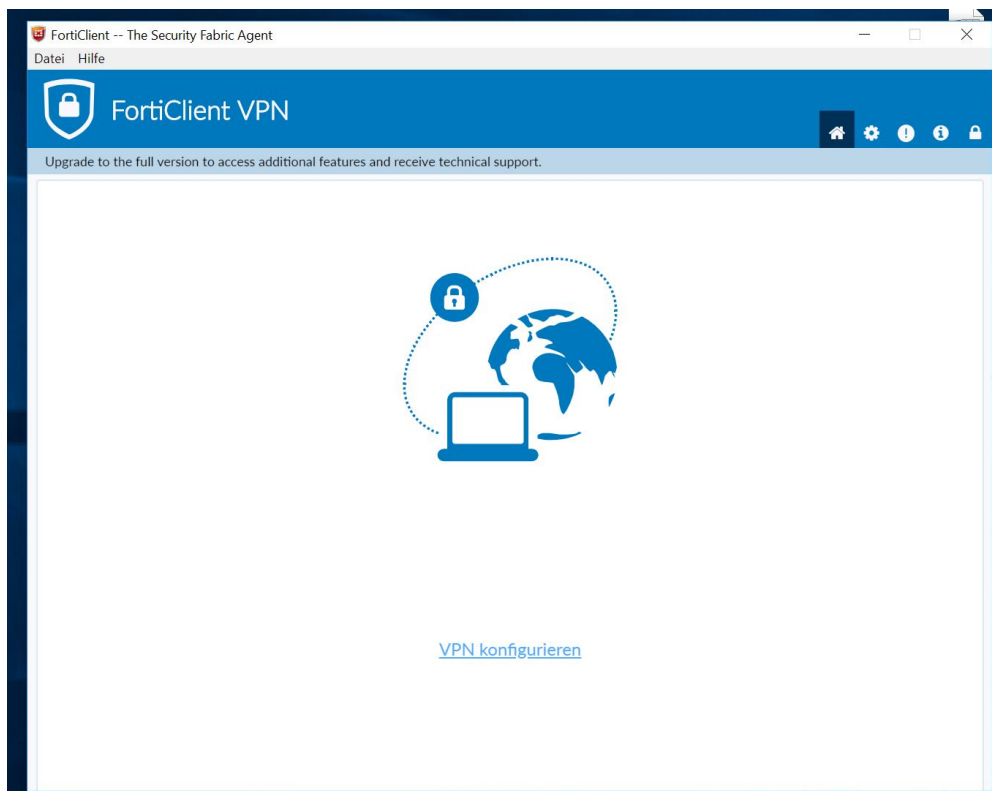

After installation, click "Finish" to exit the setup wizard.

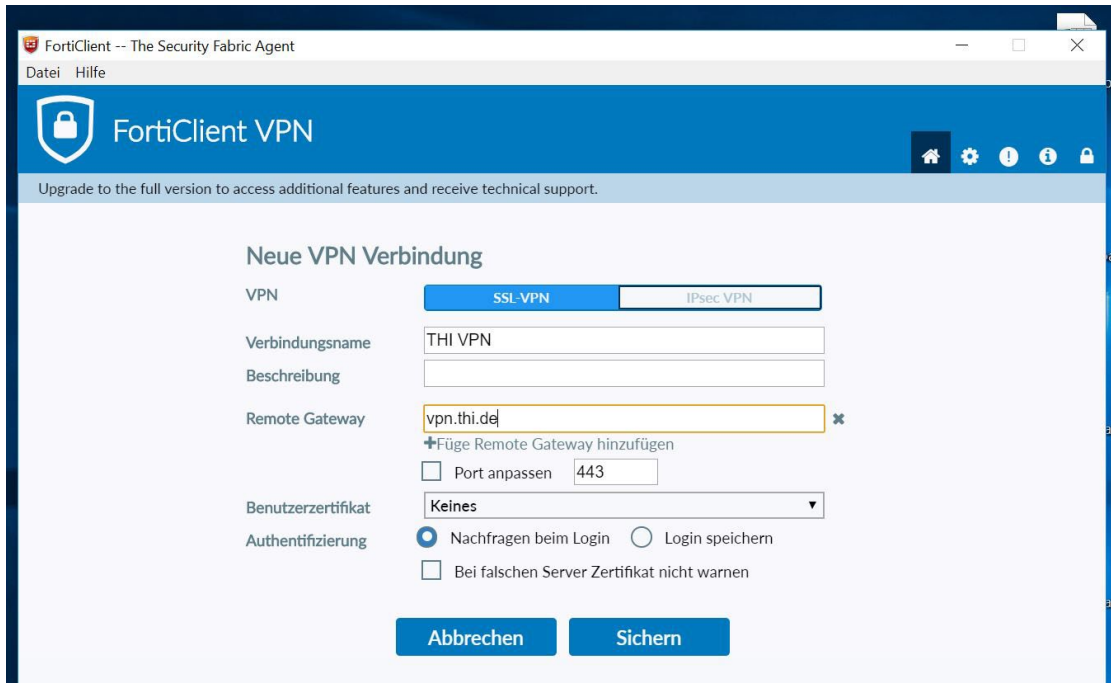

You should now find a symbol on your desktop to start the FortiClient.

Open the Client to configure the VPN connection.

To configure the connection please enter the following data:
Verbindungsname (connection name): THI VPN (for example)
Remote Gateway: **vpn.thi.de** und Port 443
Benutzerzertifikat (user certificate): Keines (none)
Authentifizierung (authentication): Nachfragen beim Login (ask for login)

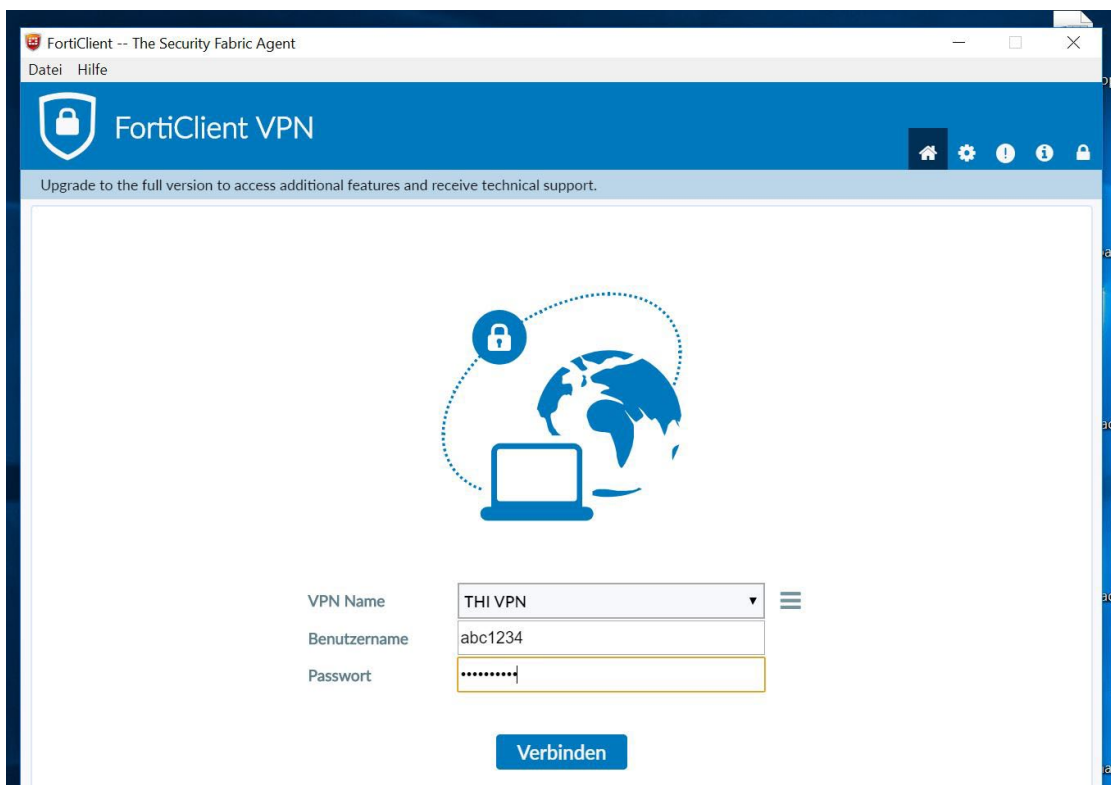

The screenshot shows the FortiClient VPN configuration window. The title bar reads 'FortiClient -- The Security Fabric Agent'. The main window has a blue header with the FortiClient logo and 'FortiClient VPN'. Below the header, there is a message: 'Upgrade to the full version to access additional features and receive technical support.' The main content area is titled 'Neue VPN Verbindung'. It features two tabs: 'SSL-VPN' (selected) and 'IPsec-VPN'. The configuration fields are as follows:

- Verbindungsname: THI VPN
- Beschreibung: (empty)
- Remote Gateway: vpn.thi.de
- Port anpassen: 443
- Benutzerzertifikat: Keines
- Authentifizierung: Nachfragen beim Login, Login speichern
- Bei falschen Server Zertifikat nicht warnen:

At the bottom, there are two buttons: 'Abbrechen' and 'Sichern'.

After saving the settings, you can log in with your THI user account.
Benutzername (user name): Your THI user name (for example: abc1234)
Passwort (password): Your THI password

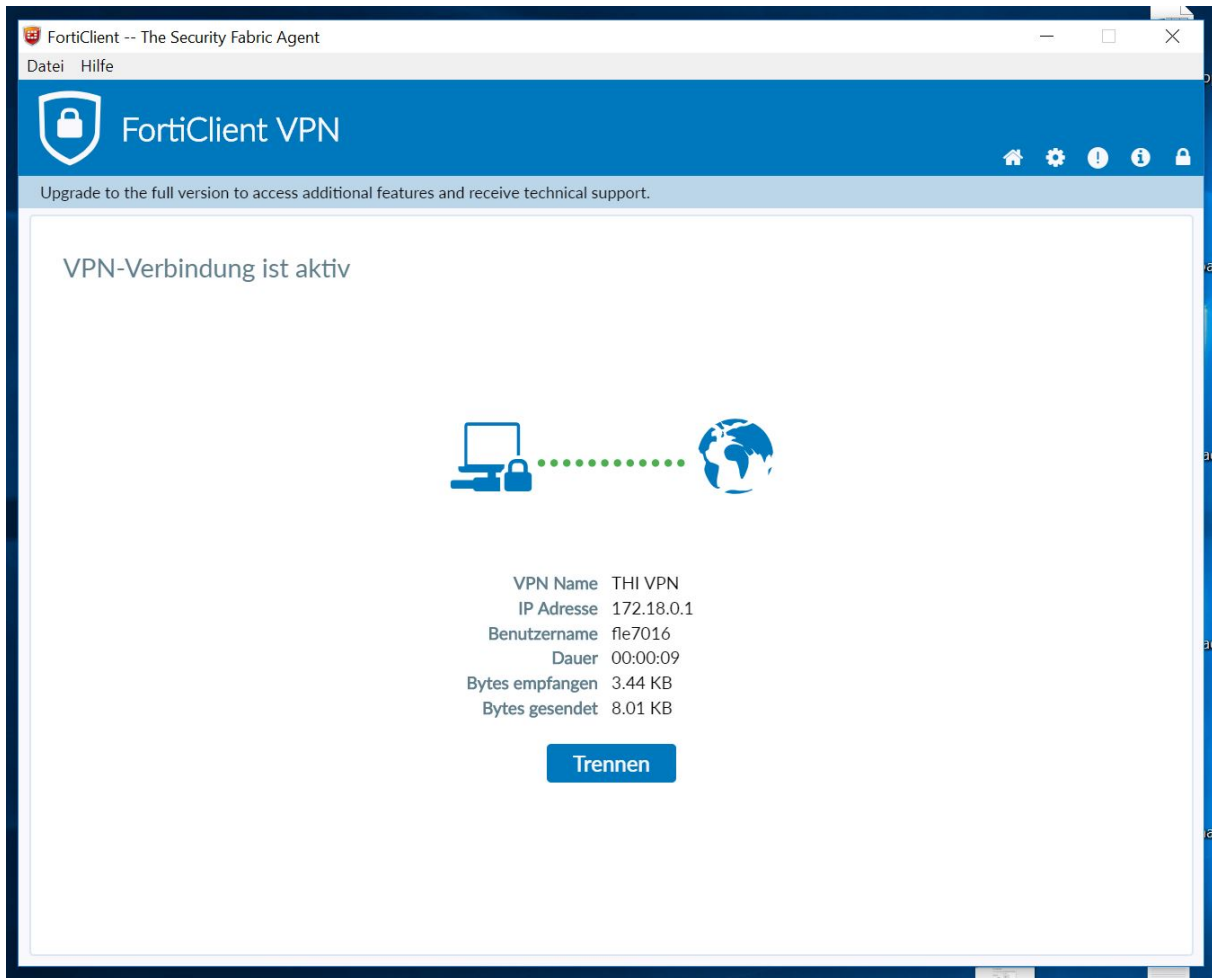

The screenshot shows the FortiClient VPN login window. The title bar reads 'FortiClient -- The Security Fabric Agent'. The main window has a blue header with the FortiClient logo and 'FortiClient VPN'. Below the header, there is a message: 'Upgrade to the full version to access additional features and receive technical support.' The main content area features a central graphic of a globe with a laptop and a padlock icon. Below the graphic, there are three input fields:

- VPN Name: THI VPN
- Benutzername: abc1234
- Passwort: (masked with dots)

At the bottom, there is a blue button labeled 'Verbinden'.

Now your VPN connection is active.

You will see a green sign with a white checkmark in your taskbar showing the status of the VPN connection. Once a padlock is visible, you are connected to the VPN.
